

4th Grade Science and Social Studies News with Mrs. Grover

Week of September 16-20, 2024

SCIENCE: Last week in Science, students completed and presented their projects on the Engineering Design Process. Students did an excellent job with their builds and learned what is necessary to complete the engineer design process. To see their work please look on ClassDojo. This week, students will begin a Unit on Energy with a look at Force and Motion. Throughout this unit they will complete many hands on labs that will allow them to experience first hand what the concepts are about. They will be getting a science book/workbook. Please make sure that your child brings this to school each day.

Vocabulary words for this week are: acceleration, force, friction, inertia, motion, speed, velocity, energy, collision, conservation of energy, energy transfer, gravity, kinetic, potential, conserve, contact, result, transform

Students will be tested on these words at the end of the unit. Testing day will be posted at a later date.

PARENTS . Please encourage your child to do all homework and classwork assignments as they are given. As we quickly approach the end of the 1st quarter, completing makeup work can be difficult and overwhelming for the student.

Social Studies: We are reading and studying The Colony of South Carolina this week. There are 8 articles in the weekly newspaper this week. We will also use Thursday to review the homework questions and prepare for the test. Students have a homework assignment this week, completing 10 questions based on the reading. The assignment will be turned in on Thursday. There will take a test on Friday. Please make sure that your child brings these newspapers back to school everyday, as we use them in class daily.

HOMEWORK REVIEW QUESTIONS AND WEEKLY TEST ARE EVERY WEEK!!!!

"I hear, and I forget. I see, and I remember. I do, and I understand."
