Sports Medicine

Student Athlete _____

Injury _____

Your child was seen today by the athletic trainer for the injury above. The plan of care for this injury is:

If you feel your child needs to see the doctor for this, remember they must have a note clearing them to return to sports.

* A return to school/work note will NOT suffice for returning to sports. It must say "cleared for sports."

* If you bring a note to the attendance office, make sure the athletic trainer gets a copy or is notified the note is in the office.

* Let the athletic trainer, principal and District Athletic Director know ASAP so the proper paperwork can be filled out for the school districts secondary insurance policy.

* Your primary insurance must be filed first before the districts secondary policy will take effect.
